The **price is charged monthly** when the account is balanced. You may **switch** your transaction module at **any time**; the price of the new model shall then apply retroactively as of the start of the account balancing period during which the switch is requested.

A **paperless transaction** is any transaction that provides or transfers an amount of money placed via electronic access channels / products (e.g. PayGate, UC eBanking global), in particular including / comprising outgoing or incoming payments (e.g. remittance and crediting of credit transfers, direct debit initiation and debiting). All instant credit transfers placed via PayGate or via HBCI/FinTS or EBICS, are classified as paperless transactions. In case of non-price-regulated SEPA payments and Non-SEPA payments, an additional processing commission (foreign trade fee) will be charged.
