

## RATING ACTION COMMENTARY

# Fitch Affirms Helaba's, BayernLB's and HVB's Public Sector Pfandbriefe at 'AAA', Outlook Stable

Thu 03 Dec, 2020 - 2:39 PM ET

Fitch Ratings - Frankfurt am Main - 03 Dec 2020: Fitch Ratings has affirmed Landesbank Hessen-Thüringen Girozentrale's (Helaba; A+/Negative/F1+), Bayerische Landesbank's (BayernLB; A-/Negative/F1) and UniCredit Bank AG's (HVB; BBB/Negative/F2) public sector Pfandbriefe at 'AAA' with Stable Outlooks.

The affirmations follow the update of Fitch's Covered Bonds and CDOs Public Entities Asset Analysis Criteria published on 16 October 2020.

## KEY RATING DRIVERS

The 'AAA' rating of Helaba's public sector Pfandbriefe is based on the bank's Long-Term Issuer Default Rating (IDR) of 'A+', the various uplifts above the IDR granted to the programme and the overcollateralisation (OC) protection for Pfandbriefe holders. The public sector Pfandbriefe are rated four notches above the bank's Long-Term IDR. This is out of a maximum achievable uplift of nine notches, consisting of a resolution uplift of two notches, a payment continuity uplift (PCU) of five notches and a recovery uplift of two notches. As the 'AAA' rating is based on a recovery only basis we did not test for timely payments in our cash flow model.

The 'AAA' rating of BayernLB's public sector Pfandbriefe is based on the bank's Long-Term IDR of 'A-' and the various uplifts above the IDR granted to the programme. It also considers the OC protection for Pfandbrief holders. The public sector Pfandbriefe rating is six notches above the bank's Long-Term IDR. The maximum achievable uplift of eight notches consists of a resolution uplift of one notch, a PCU of five notches and a recovery uplift of two notches.

HVB's Long-Term IDR of 'BBB', the various uplifts above the IDR granted to the programme and the OC protection for Pfandbrief holders are the basis for the 'AAA' rating of its public sector Pfandbriefe. The maximum achievable uplift of nine notches consists of a resolution uplift of two notches, a PCU of five notches and a recovery uplift of two notches.

As the issuers' Short-Term IDRs are above 'F3', we rely in our analysis on the lowest available OC of the last 12 months (Helaba: 16.5%; BayernLB: 22.1%; HVB: 44.5%). This provides more protection than Fitch's 'AAA' breakeven OC (Helaba: 4.5%; BayernLB: 12.0%; HVB: 13.0%).

The resolution uplift reflects that collateralised Pfandbriefe in Germany are exempt from bail-in, that Fitch deems the risk of under-collateralisation at the point of resolution to be sufficiently low, and that a resolution of Helaba, BayernLB or HVB, should it happen, is not likely to result in the direct enforcement of the recourse against the cover pool.

The two-notch resolution uplift granted to Helaba's public sector Pfandbriefe also takes into account that Helaba's IDR is based on the bank's participation in a mutual support scheme and equalised with the IDR of Sparkassen Finanzgruppe Hessen-Thüringen, which Helaba is part of. The resolution uplift for BayernLB's public sector Pfandbriefe is limited to one notch as BayernLB's IDR is support-driven. The two-notch resolution uplift granted to HVB's public sector Pfandbriefe reflects that the IDR is not driven by institutional or state support.

The five-notch PCU reflects principal liquidity protection provided by the mandatory inclusion of liquid assets in the cover pool matching the maximum negative accumulated balance of cash flows for the next 180 days under the Pfandbriefe law.

The recovery uplift for the programmes is two notches, as their timely payment rating levels are in the investment-grade category and no material downside risk to recoveries has been identified.

Fitch's 'AAA' breakeven OC for Helaba's public sector Pfandbriefe has decreased to 4.5% (from 6.0%). The reduction stems from a lower credit loss component of 4.3%

(6.2% previously) reflecting the update of Fitch's Covered Bonds and CDOs Public Entities Asset Analysis Criteria, in particular a revised assumption for exposure at sovereign default for public entities of 'AAA' and 'AA' category rated sovereigns to 40%, from 80% previously. In total, this assumption is applied to 6.5% of the cover pool.

Fitch's 'AAA' breakeven OC for BayernLB's public sector Pfandbriefe remains 12.0%, consisting of a credit loss of 3.9% (down from 4.2%) and an ALM loss of 7.9% (unchanged). The very slight decline of the credit loss reflects the exposure to municipalities from 'AAA' and 'AA' category rated sovereigns (3.2%), which are modelled with a lower conditional default rate (default following sovereign default) following the update of Fitch's Covered Bonds and CDOs Public Entities Asset Analysis Criteria.

Fitch's 'AAA' breakeven OC for HVB's public sector Pfandbriefe declined to 13.0% (from 14.0%). The ALM loss increased to 8.9% (from 8.2%), while the credit loss reduced to 4.2% (from 5.9%). The decrease in the credit loss component reflects the reduced share of Austrian (AA+/Stable/F1+) sovereign assets to 0.8% from 4.1%. For these assets, the very low sovereign recoveries of only 15% in a 'AAA' scenario are applied.

The Stable Outlooks reflect the five-notch (Helaba), two-notch (BayernLB) and one-notch (HVB) buffer against an issuer downgrade, due to the different uplift factors above the banks' Long-Term IDRs.

## **RATING SENSITIVITIES**

Factors that could, individually or collectively, lead to positive rating action/upgrade:

The public sector Pfandbriefe are rated 'AAA', which is the highest level on Fitch's scale. The ratings cannot be upgraded.

Factors that could, individually or collectively, lead to negative rating action/downgrade:

The public sector Pfandbriefe rating would be vulnerable to a downgrade if the bank's Long-Term IDR was downgraded to 'BB+' or below for Helaba's and HVB's public sector Pfandbriefe and 'BBB-' or below for BayernLB's public sector Pfandbriefe, respectively; or if the OC considered by Fitch in its analysis provides less protection than Fitch's 'AAA' breakeven OC. Fitch's 'AAA' breakeven OC for Helaba's public sector Pfandbriefe is likely to increase in the event of an IDR downgrade as we would test for timely payments in our cash-flow model.

If the OC that Fitch considers in its analysis drops to the legal minimum requirement of 2% on a net present value basis, the programmes could only achieve a one-notch recovery uplift. As a result, Helaba's public sector Pfandbriefe rating would likely be downgraded to 'AA+', one notch above the bank's Long-Term IDR as adjusted by the resolution uplift (downgrades to 'A+' for BayernLB's and 'A' for HVB's public sector Pfandbriefe, respectively).

Fitch expects the coronavirus containment measures to negatively impact the performance of public sector assets. However, the public sector Pfandbriefe ratings benefit from a significant cushion between the OC that Fitch relies upon in its analysis and Fitch's 'AAA' breakeven OC. In addition, the public sector Pfandbriefe ratings are well protected by the buffer against a downgrade of the issuer's Long-Term IDR. The dual-recourse nature of Pfandbriefe means the issuer is liable to pay the bonds irrespective of the performance of the cover pool. Nevertheless, the agency expects the OC cushion and the buffer against an issuer downgrade to reduce as a consequence of the coronavirus crisis.

Fitch's 'AAA' breakeven OC is likely to increase if Germany (AAA/Stable/F1+) was downgraded, to cover increased credit losses. In tested rating scenarios above the credit-linked sovereign rating the sovereign is assumed to default. While the Outlooks on some sovereign ratings have been revised to Negative in 2020 reflecting risks from the pandemic, only two sovereigns represented in the cover pool have been downgraded in 2020: Canada by one notch to 'AA+'/Stable from 'AAA' and the UK by one notch to 'AA-'/Negative from 'AA'.

Fitch performed a downside sensitivity scenario stress by increasing the credit loss, as well as increasing the cost to refinance the cover pool. The additional stresses would lead to an increase of the 'AAA' breakeven OC. However, the current level of OC Fitch relies upon provides sufficient protection for the 'AAA' ratings.

Fitch's breakeven OC for the Pfandbriefe rating will be affected, among other factors, by the profile of the cover assets relative to outstanding Pfandbriefe, which can change over time, even in the absence of new issuance. Therefore, the breakeven OC to maintain the Pfandbriefe rating cannot be assumed to remain stable over time.

## **BEST/WORST CASE RATING SCENARIO**

International scale credit ratings of Financial Institutions and Covered Bond issuers have a best-case rating upgrade scenario (defined as the 99th percentile of rating transitions, measured in a positive direction) of three notches over a three-year rating

horizon; and a worst-case rating downgrade scenario (defined as the 99th percentile of rating transitions, measured in a negative direction) of four notches over three years. The complete span of best- and worst-case scenario credit ratings for all rating categories ranges from 'AAA' to 'D'. Best- and worst-case scenario credit ratings are based on historical performance. For more information about the methodology used to determine sector-specific best- and worst-case scenario credit ratings, visit [<https://www.fitchratings.com/site/re/10111579>]

## **SOURCES OF INFORMATION**

The issuer has informed Fitch that not all relevant underlying information used in the analysis of the rated bonds is public.

## **REFERENCES FOR SUBSTANTIALLY MATERIAL SOURCE CITED AS KEY DRIVER OF RATING**

The principal sources of information used in the analysis are described in the Applicable Criteria.

## **PUBLIC RATINGS WITH CREDIT LINKAGE TO OTHER RATINGS**

Helaba's, BayernLB's and HVB's public sector Pfandbrief rating remains credit-linked to Germany as a significant share of cover assets are made up of exposures to or guaranteed by the German sovereign (Helaba: 41.4%; BayernLB: 45.0%; HVB: 43.6%; representing a part of the total German exposure in the pools), according to Fitch's classification, while in the analysis of the German sub-sovereign exposure, the sovereign is not assumed to default.

The Pfandbriefe rating is driven by the credit risk of Helaba, BayernLB and HVB, respectively, as measured by their respective Long-Term IDRs.

## **ESG CONSIDERATIONS**

Unless otherwise disclosed in this section, the highest level of ESG credit relevance is a score of '3'. This means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. For more information on Fitch's ESG Relevance Scores, visit [www.fitchratings.com/esg](http://www.fitchratings.com/esg)

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources

are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the

tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
