UC eBanking USA – RSA Token Pin Setup for Trade Finance

Quick Guide
September 2012

Life is full of ups and downs.
We're there for both.

Welcome to
UniCredit
Corporate & Investment Banking

1. PURPOSE AND RECEIPT OF TOKEN

The following is meant to guide you through the initial setup of your new RSA Token Security Device that you need for digital signatures within UC eBanking USA.

- The RSA Token is only necessary for the digital signing of transactions, not for logging in.
- **Important:** After having received the RSA Token Security Device, you must return an original signed copy of the letter back to the bank, before the token will be active.

2. FIRST TIME PIN CREATION

- You need to generate a PIN number for your RSA token when you are approving your very first transaction. Your PIN will remain the same for all future approvals.
- To create your PIN select the first transaction(s) you wish to approve and then select the button “Approve” at the bottom of the screen on the right:

Transaction Type	Transaction Amount	Customer Reference- Amd. Seq.	Bank Reference	Status	Last User	Counter Party
STANDBY LETTER OF CREDIT (1) ITEMS SHOWN						
Transaction Origination	334,444.00 GBP US Corp JB Turkey	SBT500025	Pending Approval (0 of 1)	JBRSAUB1	JB Turkey	

The following message will then pop up:

UniCredit
Corporate & Investment Banking

Trade Finance

Transactions in Process

Use this screen to modify, delete or approve any of the transactions.

Filter by:

- Status: All Transaction Statuses
- Instrument Type: All Instrument Types
- Customer Reference: [Input Field]
- Amount From: [Input Field]

Warning:

To complete this transaction, please enter your personal PIN code followed by the RSA passcode. If this is your first time using the token you will need to generate a PIN in the next step. Now enter ONLY the six-digit passcode on your RSA token and select "Approve".

To continue, click Confirm below. Otherwise, click Cancel.

By clicking "Confirm" the user acknowledges that they have read, understand, and agree to the terms and conditions that are presented directly on the electronic form for every transaction.

*** Passcode:** [Input Field]

Cancel **Confirm**

Display 50 | 100 | 500 | 1000 items per page
18 items found, displaying all items

Save as Template View Delete Reject Approve Select

Since this is your first time approving a transaction, the passcode you will enter is at first **ONLY** the six digit ever-changing passcode on your token:

After having entered this passcode, click on "Confirm" before the Timer runs out, which brings you to the following PIN creation page:

New PIN Required

Use this screen to create a new PIN number.

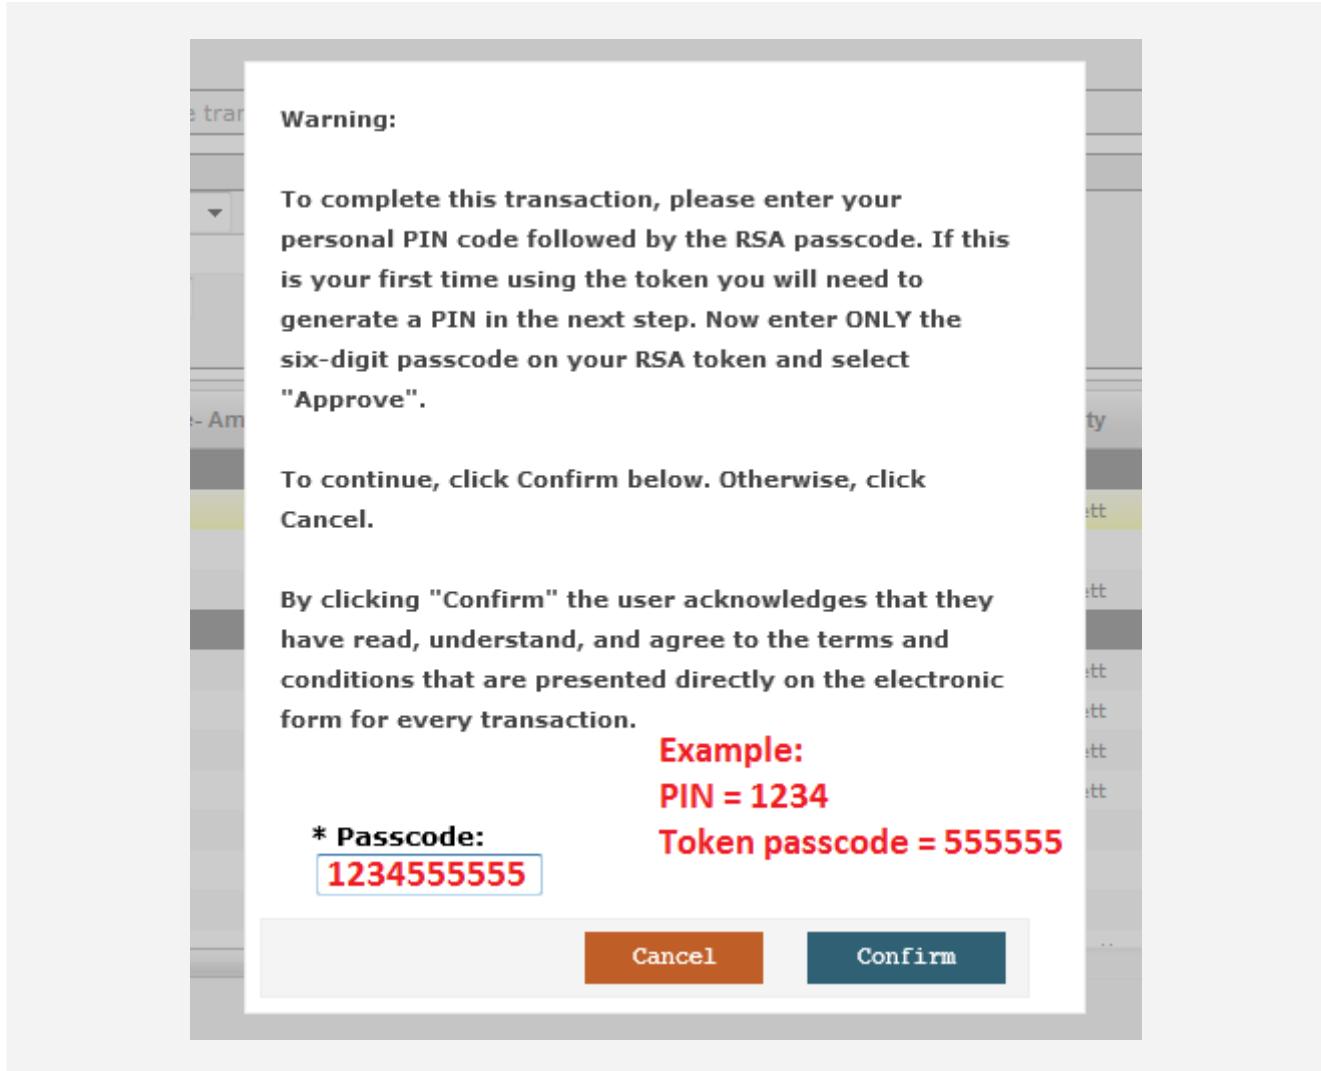

Secure Login:

New Pin: [Input Field]

Repeat Pin: [Input Field]

Submit

- In this step you must generate the PIN of your choosing (between 4 and 6 characters long). After having entered and repeated what you want your personal PIN to be, click on “Submit” and you will be back in the transaction overview page where you started.
- You now must re-authenticate the transaction with your new PIN. Just as was done before, select the checkbox next to the transaction and select “Approve” at the bottom of the page. Once again the following will pop-up:

Here, just as it will be for all future transaction approvals you must enter:

- First your 4 – 6 digit PIN
- Then the 6 digit Token passcode

Important: Wait for the next token passcode before re-authenticating the payment.
